

Amendments to the Claims

1. (Cancelled)

2. (Cancelled)

3. (Cancelled)

C1
4. (Second Amendment) A process of producing a window covering which combines:

(a) providing a thin, flexible film of plastic material, having a thickness between 4 mil and 10 mil which self-adheres to a non-porous surface through cohesion and atmospheric pressure,

(b) a printed, printing a colored image on the film which is translucent, allowing light to pass through but diffusing it so that objects on either side cannot be clearly distinguished from the other side,

whereby a window covering is made which is easily installed and removable, visually exciting, colorful, and translucent, that is, it allows light to pass through but which cannot be clearly seen through.

5. (Second Amendment) A process according to claim 4 which further combines:

(a) printing the colored image using sunfast UV inks, ultra-violet light absorbing varnishes, and hardening agents and applying a varnish comprising UV absorber and hardening agent to the printed image in such a manner that the result-resultant window covering has a translucent printed colored image and absorbs most of the ultra-violet light and resists damage,

whereby a window covering ~~is made which has the qualities described in claim 4 and has~~ been printed and coated in such a manner as to be highly-resistant to the effects of ultra-violet light, protect the interior contents from the harmful effects of ultra-violet light, and is highly resistant to scratching ~~and other types of damage.~~

6. (Second Amendment) A process of producing a window covering which combines:

(a) producing a thin, flexible film of plastic material, having a thickness between 4 mil and 10 mil which self-adheres to a non-porous surface through cohesion and atmospheric pressure;

(b) ~~a printed,~~ printing a colored image which is translucent, allowing light to pass through but diffusing it so that objects on either side cannot be clearly distinguished from the other side;

whereby a window covering is made which is easily installed and removable, visually exciting, colorful, and translucent, that is, it allows light to pass through but which cannot be clearly seen through;

the process further combining:

(c) printing the colored image using sunfast UV inks, and applying ultra-violet light absorbing varnishes, and hardening agents to the colored image in such a manner that the ~~result~~ resultant window covering has a translucent printed colored image thereon and absorbs most of the ultra-violet light and resists damage;

whereby a window covering is made which ~~has the qualities described in claim 4 and~~ has been printed and coated in such a manner as to be highly-resistant to the effects of ultra-violet light, protect the interior contents from the harmful effects of ultra-violet light, and is highly resistant to scratching ~~and other types of damage~~;

the process further combining:

(d) ~~images which have designs that tile together~~ providing a printed colored image which is assembled from individual pieces, to fill spaces larger than the individual pieces,

whereby a window covering is made which ~~has the properties described in this claim~~ is resistant to the effects of ultraviolet light, protects the interior contents from the harmful effects of ultraviolet light and is resistant to scratching and which has the additional quality of being able to fit almost any size window.
